Objective

To work in one of the most challenging professions in this modern market. Digital Design and Production. To learn new skills and offer the skills I have already learned. To exceed expectations and to achieve great things in a highly intense deadline driven field. To be the best there is in producing high quality work under tight deadlines and very little guidance. To get the right attention to the right product. To attract the eye and gain the recognition for products and services that merit them. To produce and market the best possible product.

Education

**New Hampshire Community
Technical College, Manchester, NH**
**Associates - Commercial Design &
Illustration, Graduated June 2006**
Certificate in Commercial Illustration, June 2006

Experience

FedEx Kinkos, Salem, NH
Assistant Manager *June 2005 - Present*

The Greatest thing about working at FedEx Kinkos is all the skills I have learned. From online training seminars to hands on technology training to just every day tips and tricks that help us get the job done. Through working there, I have developed a lot of skills, and one of the most important skills I've learned is team building. Without being able to manage a team, the work would not be able to get done, and keeping a team together takes a lot of work. Through my leadership and skill we are able to produce the jobs that typically only large companies could, and in a shorter amount of time.

Major Skills

I'm an Experienced Production Operator with exceptional knowledge of commercial design, commercial illustration, and computer sciences. A Strong understanding of processes for print reproduction, coordination of deadlines, outsourcing, supply ordering, and anything else it takes to keep the jobs on time and at their best possible quality.

I'm Skilled at learning and mastering new concepts quickly, working well under pressure, and communicating ideas clearly and effectively to other coworkers. I'm Able to take the lead in any situation and have everyone come out better for it. I deliver peace of mind, knowing that in my hands, the job will get done. No Matter What.

I have Extensive computer training, including software such as **Adobe CS3, QuarkXPress 6, Corel Draw SE, Microsoft Office 2003//2007, and Macromedia Studio**. I'm able to do almost anything in Adobe software. I have the ability to create, manipulate, correct, and design several creative images and compositions. I'm able to pick up applications very quickly, and can use Windows or Machintosh based Operating systems, I've also had extensive training in Database Management and problematic file troubleshooting.

Thank You

Ryan Hirsch
